| <b>Total</b>                                 |                                |   |   |  |                         |                       |               |

**CONTROL MEASURES**

Check all control measures taken in response to the outbreak.

- Isolation of suspected and confirmed cases (non-staff: incarcerated/detained individuals - separate physical locations, cohorted or individually)
- Quarantine, or instruct to quarantine, close contacts affiliated with facility in restricted areas (non-staff: incarcerated/detained individuals) or at home (staff)
- Maintained routine screening testing (e.g., testing incarcerated/detained individuals at intake)
- Maintained diagnostic testing for incarcerated/detained individuals
- Implemented enhanced screening testing (e.g., movement based screening testing, testing before transfer to another facility, testing before release, testing before/after community visits)
- Notification of staff and non-staff (incarcerated/detained individuals) of outbreak at site while maintaining patient privacy
- Posted notification of outbreak at facility entrance and common areas
- Notification to clients, vendors, or visitors who are close contacts to cases at facility
- Implemented symptom screening and temperature checks for all staff, incarcerated/detained persons, and visitors
- Maintained daily visitor log
- Facility temporarily closed to vendors or visitors for \_\_\_\_\_ days/weeks
- Staff cohorted to specific patients or areas
- Staff essential to operations retained at facility
- Social distancing measures reinforced (describe): \_\_\_\_\_
- Increased education on respiratory and hand hygiene
- LACDPH mobile vaccine unit was deployed to facility: Date(s) \_\_\_\_\_
- Other measures (describe): \_\_\_\_\_

**REMARKS (Include: line list, map, epidemic curve, EH site visit reports, laboratory results, and other associated documents, if available).**
