

Primary healthcare providers and emergency room staff are often the first to recognize unusual occurrences and patterns of disease—they will probably be the first to recognize local human cases of avian or pandemic influenza or other serious novel illnesses.

Don't forget to ask if your patient has . . .

- **recently traveled out of the United States.**
- **been around chickens, ducks or other birds.**
- **been around someone else who is sick who has**
 - **recently traveled out of the United States or**
 - **been around birds.**
