**SWIMMING POOL SERVICE TECHNICIAN CERTIFICATION
EXAMINATION APPLICATION**

1. Fill out the requested information on the application. The applicant may choose to provide a business telephone number or email address to be posted for public use on the Certified Swimming Pool Service Technicians List http://publichealth.lacounty.gov/eh/docs/ep_rw_telist.pdf. Applications received without a business telephone or an email address will be listed with the technician's name only.
2. Specify the Technician examination or the Apprentice Technician examination.
3. Submit a picture of the applicant (REQUIRED). A copy of the driver's license picture is acceptable.
4. A California Driver's License is not required; however, a picture ID or other official document (ie passport or birth certificate) will be required at check-in for the examination.
5. Sign the application.
6. Enclose a personal check, bank check or money order payable to the LOS ANGELES COUNTY DEPARTMENT OF PUBLIC HEALTH (cash **will not** be accepted by mail). All payments including cash (exact change) may be made in person at the Baldwin Park office. **Credit card payments cannot be accepted.**
7. Examination fees are non-refundable. A new fee is required each time the examination is taken and must be received by Recreational Waters Program at least one week before the exam. The examination must be taken within one year after payment of the fee.
8. The Technician examination is scheduled at least monthly. The Apprentice Technician examination is scheduled as needed. Call (626) 430-5360 for a reservation for either examination.

Technician Exam: Applicants may be questioned on the following topics.

- California Code of Regulations Titles 22 & 24 regarding requirements at public pools.
- Local laws, ordinances, rules and regulations applicable to swimming pools
- Disinfection, pH and stabilizer levels.
- Requirement of operational records.
- Clarity, bacteriological and chemical quality of pool water.
- General requirements for maintaining pools clean, sanitary and in good repair.
- Skimmers and their proper operation and maintenance.
- Required turnover rates.
- Replacement of equipment.
- Backflow protection.
- Pressure gauges
- Flow meters.
- Chlorine gas.
- Maximum water temperatures.
- Breakpoint chlorination.
- Chlorine and bromine-based products used to disinfect pool water.
- Methods of action of disinfectants in clarifying and sanitizing pool water.
- Advantages and disadvantages of various disinfectants, their properties and effects on pool water.
- Chlorine demand. Combined, total, and free available chlorine.
- Alternate methods of disinfection and treatment of pool water.
- Balance of pool water. Total alkalinity, calcium hardness and pH, and proper levels in pool water.
- Other chemicals used in pool maintenance including stabilizers, sequestrants, algicides, and flocculants.
- Effects of corrosive and alkaline water.
- Tests and proper use of test kits for measuring disinfectant residuals, pH and other chemical levels in pool water.
- Detrimental effects on health of improperly disinfected and balanced pool water.
- Pool chemical safety.
- Pool filter types, capabilities, sizing, cleaning and maintenance.
- Pool pumps, basic design, operation, characteristics, and maintenance. Pump curves.
- Chemical feeders, their proper sizing, use, and maintenance.
- Supplemental equipment associated with pool recirculation systems including, separation tanks, multiport valves, hydrostatic valves, sizing of pool heaters, and ORP meters.

Applicants may be asked to calculate the following.

- Volume of pool and spa .
- Elevate or lower pH, alkalinity, calcium and stabilizer levels.
- Levels of disinfectant in part per million given a pool volume and amount of disinfectant added.
- Minimum flow rates, turnover rates, and filter sizes for public pools.
- Total dynamic head of a pool recirculation system.
- Flow rate from total dynamic head and pump curve charts.
- Volume of water loss through leakage and evaporation.
- Saturation index.
- Horsepower given watts, voltage, and amperage.

Apprentice Technician Exam: Applicants may be questioned on the following topics;

- California Code of Regulations Titles 22 & 24 regarding requirements at public pools.
- Local laws, ordinances, rules and regulations applicable to swimming pools.
- Cleaning, servicing, and maintaining swimming pools.
- Basic knowledge of the commonly used chemicals and their effects.
- Testing procedures for the determination of pH and chlorine residual.
- Cleaning methods.
- Pool operation.
- Basic knowledge of filters, pumps, motors, and chemical feeders.
