

## *Fall 2025 SNF Vaccination Planning: Pharmacy Processes and Ordering Timelines*

Los Angeles County Department of Public Health

Vaccine Preventable Disease Control Program  
Acute Communicable Disease Control Program

# Agenda Overview

- Presentation by Skilled Nursing Pharmacy
- Presentation by Elements Pharmacy
- Q&A for presenters
- LACDPH survey
- Additional resources
- Concluding comments/questions

# Disclosures

There is no commercial support for today's call

Neither the speakers nor planners for today's call have disclosed any financial interests related to the content of the meeting

This call is meant for healthcare facilities and is off the record and reporters should log off now

# Housekeeping

- **Microphones** are disabled. For questions, please use the chat.
- **Cameras:** please keep them turned off during the presentation.
- **Recording:** the presentation is being recorded and will be posted on the LACDPH SNF Website within a few weeks following the session.

# ***Fall 2025 SNF Vaccination Planning: Pharmacy Processes and Ordering Timelines***

Presented by:  
Ryan Haase Pharm.D.  
Consultant Pharmacist  
Skilled Nursing Pharmacy

## **Vaccine Ordering at Skilled Nursing Pharmacy**

- All vaccine orders are placed for a specific resident.
- Pre Booking bulk ordering does occur, but is mostly for Influenza Vaccine orders.
- Orders are recommended to be placed electronically (Ex: PCC).

## **Processing Time**

- **SNP processing time for Vaccines to be sent is within one day of receiving the order.**
- **Delays can occur:**
  - Manufacturer limited supply.
  - Back orders especially during peak vaccination time.
  - Noncovered high cost vaccines.

# Anticipation of 2025-2026 Vaccines

## Covid-19 Current Recommendation

- [Key health care organizations](#) recommend that all individuals aged 6 months and older be offered updated COVID-19 vaccines as they become available.
- Adults 65 years and older are recommended to receive 2 doses of any updated COVID-19 vaccine separated by 6 months (minimum interval 2 months) regardless of vaccination history.

## Getting the updated COVID-19 vaccine is especially important if you:

- Never received a COVID-19 vaccine.
- Are ages 65 years and older.
- Are at high risk for severe COVID-19.
- Are living in a long-term care facility.
- [Pregnant persons](#)

# Anticipation of 2025-2026 Vaccines

## Influenza Vaccine

- CDC recommends everyone aged 6 months and older get an annual flu vaccine, ideally before the end of October before flu starts circulating.
- Important for people at high risk for developing serious complications from flu, including:
  - People 65 years and older,
  - People with chronic medical conditions (i.e., heart, lung, kidney, and liver disease) including obesity, asthma, diabetes or weakened immune systems.
  - People who live in nursing homes or long-term care facilities.
- For those aged 65 years and older – High-dose, recombinant, or adjuvanted flu vaccines are recommended if they are available:
  - Fluzone
  - Flublok
  - Fluad

# Anticipation of 2025-2026 Vaccines

- FDA has advised the COVID-19 vaccines in fall 2025 should be monovalent JN.1-lineage-based COVID-19 vaccines (2025-2026 Formula).
- FDA has also approved the composition of the Influenza Vaccine 2025-2026.
- Currently the 2025-2026 vaccines are unavailable at Skilled Nursing Pharmacy.
- Expected date of availability is August/September.

# Consent Process

- Medicare regulations require nursing homes to offer residents the influenza (flu), Pneumococcal and COVID-19 Vaccinations, and education regarding these vaccinations.
- Consent is a common practice, and is required for COVID-19 vaccination.
- If a resident is unable to communicate or make decisions about their vaccination, consent can be provided by a medical proxy or substitute decision-maker appointed to make medical decisions on their behalf.
- Documentation of consent or assent must be recorded in the resident's medical chart according to the provider's standard practice.

## Scheduling Clinics

- Skilled Nursing Pharmacy is not currently offering vaccination clinics.
- Pharmacies serving long-term care facilities can be found through resources like the LA County Department of Public Health.

# Helpful Tips

- **Be Proactive**

- Follow up with pharmacy regarding availability of new Vaccines (August and September).
- Stay in contact with your pharmacy team (Consultant Pharmacist, Nurse Consultant, Customer Success Managers).

- **Be Prepared**

- Set up project leader
- Determine Vaccine Needs
- Explore facility billing/Cost
- Review facility policies
- Explore scheduling options
- Plan vaccine administration
- Document vaccinations

# Champion Facility #1

- Facility is highly proactive with vaccine follow up.
- Facility Staff (nursing, DON, and Administrative) make a strong effort to follow up on new vaccine availability during the COVID-19 and Flu season.
- This facility works closely with there Skilled Nursing Pharmacy customer success manager, and consultant pharmacist.

## Champion Facility #2

- Facility finds major success through proper planning.
- Infection Prevention control nurse is given the responsibility for planning Vaccine Administration, and Clinics.
- Facility started planning early (late June/Early July)
- Planning that has already occurred:
  - Vaccine cost for facility and residents
  - Vaccine need
  - Order Entry
  - Possible days for a Vaccination clinic/administration day

PHARMACY

# ELEMENTS OF PREVENTIVE HEALTH

*Specialized Patient Care Leading to Outstanding Outcomes*

## Successful Vaccination Programs in Skilled Nursing Facilities

- Free Vaccination Clinics for facility, residents and staff
  - Offer staff vaccinations during every vaccine clinic
- No minimum number of vaccines required
- Scheduled/frequent recurring vaccine clinics
- Experts in ACIP/CDC recommendations and vaccine schedules
  - Underlying medical conditions, past vaccination history, age qualification, past vaccine reactions, allergies, etc.
- Resident vaccine evaluations to evaluate for eligible vaccines
- Insurance expertise – Medicare Part B, C, D, Medi-Cal, etc.
  - Prior authorizations / Insurance overrides (PACE programs, narrow network plans, immunizations billed but not administered), eligibility issues

## Successful Vaccination Programs in Skilled Nursing Facilities

- Access to free vaccines for uninsured staff (Bridge Access Program COVID vaccines, State General Fund flu vaccines)
- Access to free vaccines for residents without insurance to cover vaccines (Ex. Medicare A only, VA)
- Consistent communication (phone, emails) between vaccine provider and IP Nurse / DSD / DON to provide information on vaccination rates, hospitalization rates, outbreaks, reinforce CDC and DPH updates, clinic scheduling reminders, updated vaccine recommendations, etc.
- Schedule vaccine clinics on short notice if needed
- Educational in-services for staff, residents and families

## Successful Vaccination Programs in Skilled Nursing Facilities

- Flexible vaccination plans (room-to-room, common areas, dining room, activity room, smoking patio – finding residents)
- Provide education and a friendly face at bedside to minimize vaccine refusals
- Verification of vaccination history in CAIR and SNF vaccination records no more than 24 hours prior to vaccine clinics
- Ease the burden on IP Nurses that encourages them to continue scheduling clinics
  - Report all vaccines to CAIR and other Immunization Registries (ex. RIDE)
  - Stewardship for vaccine consent forms – staff turnover can lead to misplaced forms at the SNF

## Successful Vaccination Programs in Skilled Nursing Facilities

- Assistance with P/P review to ensure SNF policies are updated with the most recent CDC guidance
- Access to the most current Vaccine Information Sheets (VIS) for each vaccine for resident and/or representative
- Access to updated SNF specific Vaccine Consent / Declination Forms
- Focused Vaccine Specialty Provider – never interfere with services of other providers
- Ease of communication, requesting vaccine clinics and documentation submission
  - Secure Portal, Fax, Email, QR code

# Corporate Partnerships Optimize Vaccination

- Minimize unreimbursed SNF vaccine expenditure, expired and wasted vaccines and vaccines administered without reimbursement (Residents and staff)
- **Plan for Fall vaccine billing – Medicare A and Employees**
- Optimize Medicare Part B vaccine administration to Medicare Part A residents to create a profit center
- Direct billing to Medicare Advantage Plans (Medicare Part C)
- Resolve vaccine coverage issues for residents with Medicare Part A only, Medicare Parts A and B without a Medicare Part D plan, residents in PACE programs, residents in narrow-network plans

## Corporate Partnerships Optimize Vaccination

- Collaborate to create a crosswalk for SNF Administrators and IP Nurses who are uncomfortable with authorizing vaccine charges leading to sub-optimal vaccination rates
- Participate in multi-disciplinary team pre-admission process – Plan vaccination prior to hospital discharge for resident with Medicare Part A only
- Medicare Part D education, right-to-choose, information and benefits of a Part D plan upon admission
- Coverage for entire state of CA to ease the corporate burden

# Q&A

# We want to hear from you!

Please complete this brief survey to inform LACDPH about your pharmacy plans for Fall/Winter 2025:

# Vaccine Management Reminders

- COVID-19 vaccines are available in single dose vials and syringes
  - 10 doses are available in each box
- mNEXSPIKE (Moderna) and NUVAXOVID (Novavax) are new COVID-19 vaccine products approved for use in 65+ population
  - MNEXSPIKE is approved for use in individuals who have been previously vaccinated with any COVID-19 vaccine
  - MNEXSPIKE and NUVAXOVID are also indicated for individuals 12 through 64 years who have at least one underlying condition that puts them at high risk for severe outcomes from COVID-19
- Flu vaccine always expires at the end of May or June
  - The upcoming season expiration will be June 30, 2026
- Order Flu vaccine in multiples of 10 doses (10 doses, 20 doses, 30 doses, etc.)

## Vaccine Management Reminders Cont.

- RSV vaccine for adults is available in 3 products: Abrysvo (Pfizer), Arexvy (GSK), mRESVIA (Moderna)
- RSV vaccine expiration date is 18 months (Abrysvo; mRESVIA) from the manufacture date or 24 months from the manufacture date (Arexvy)
- A single dose of any FDA-licensed RSV vaccine is recommended for all adults ages 75 and older and adults ages 50–74 at increased risk of severe RSV.

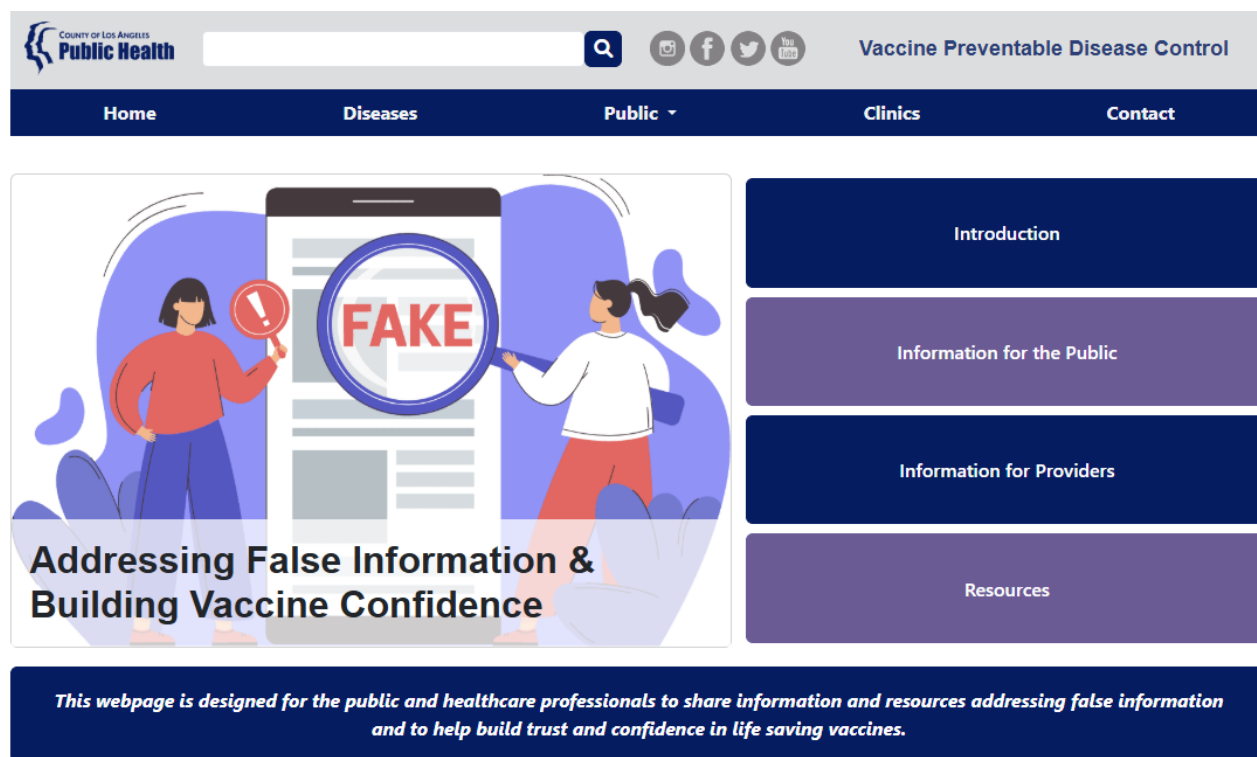

# Current COVID-19 Vaccine Recommendations

- Recent federal policy statements and changes have raised questions and confusion about recommendations and access to COVID-19 vaccines.
- COVID-19 vaccines continue to be important tools to prevent severe disease in vulnerable populations.
- CDPH recommends that all individuals age 6 months and older should have access and the choice to receive currently authorized COVID-19 vaccines, with an emphasis on protecting higher risk individuals, such as infants and toddlers, pregnant individuals, and others with risks for serious disease.
- Insurance coverage for COVID-19 vaccines is still in place.
- Adults 65 years and older or immunocompromised are recommended to receive two doses of the 2024 – 2025 COVID-19 vaccine separated by 6 months (minimum interval 2 months). \*To be considered “Up-to-Date”, they must have received the 2<sup>nd</sup> dose.
- COVID-19 activity is rising. While COVID-19 seasonality is uncertain, a summer wave is expected. Majority of COVID-19 burden from last year occurred during the 2024 summer wave. Older adults and young children continue to have the highest COVID-19 hospitalization rates.
