

A PHASED APPROACH TO REOPENING SAFELY IN LOS ANGELES COUNTY

Los Angeles County has worked together to slow the spread of COVID-19 by following the Safer at Home order. As we plan for recovery and the gradual relaxing of Safer at Home, we are sharing the Department of Public Health's Roadmap to Recovery. This provides goalposts for reopening as safely as possible.

Safeguards in Place Before Opening

Ensuring health care system capacity

Protecting vulnerable populations

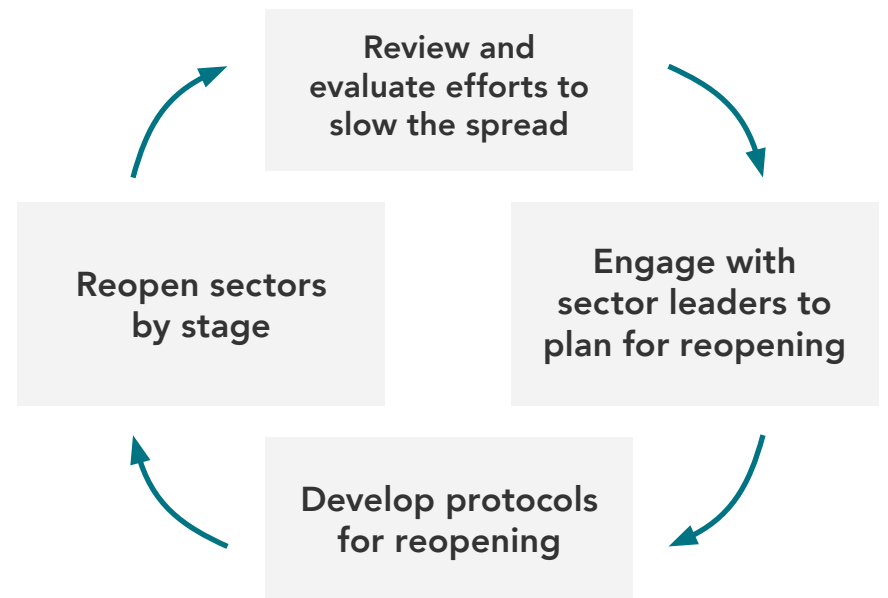

Ensuring public health capacity to test, trace and isolate

Developing protocols to keep workers and residents safe

Process for Staged Reopening

Five-Stage Reopening Process Based On Risk

Stage One	Stage Two <i>Now</i>	Stage Three <i>TBD</i>	Stage Four <i>TBD</i>	Stage Five <i>TBD</i>
Safer at Home Order Planning for Recovery	<ul style="list-style-type: none"> Florists, some retailers, car dealerships, golf courses and trails Other low-risk businesses (manufacturers, offices, retail) Essential health care Outdoor recreation and libraries Museums, cultural centers, galleries 	<ul style="list-style-type: none"> Higher-risk businesses (body art, massage, bars/nightclubs) Movie theatres and bowling alleys K-12 Schools Colleges and universities 	<ul style="list-style-type: none"> Highest risk businesses (entertainment venues) Large conventions Sporting and spectator events 	Fully normal operations

Planning for a Safe Reopening

Each sector will have reopening protocols that address the following areas of concern:

Protecting and supporting worker and customer health and safety

Ensuring appropriate physical distancing

Ensuring proper infection control

Communicating with the public

Ensuring equitable access to services for vulnerable populations

Are We Slowing The Spread?

How capable are we of slowing the spread?

- Do we have sufficient hospital capacity, including ventilators and ICU beds?
- Is the supply of PPE adequate for all health care workers?
- Do we have sufficient testing capacity and testing supplies?
- Do we have sufficient case and contact tracing capacity?

How effective are we in slowing the spread?

- Are mortality rates by age, poverty status, and race/ethnicity relatively stable?
- Are hospitalization rates by age, poverty status, and race/ethnicity relatively stable?
- Do all high-risk populations have adequate access to testing?
