The County of Los Angeles Department of Public Health is adopting a staged approach, supported by science and public health expertise, to allow for people to start to use public spaces again in ways that will limit the risk of exposure to COVID-19. **Accordingly, on May 13, the County of Los Angeles is reopening beaches in limited ways to allow residents increased outdoor recreation options.** Staying physically active is one of the best ways to keep your mind and body healthy. Using public beaches can be an important way to relieve stress, get some fresh air and vitamin D, stay active, and safely connect with nature. During the COVID-19 pandemic, it is crucially important that you follow the DO’s and DON’Ts below in order to use beaches in a way that keeps you and others healthy.

**DOs**

1. Prepare before you visit the beach.
   a. Check to see which areas or services are open and bring what you need with you. Information on LA County beaches can be found at [beaches.lacounty.gov](http://beaches.lacounty.gov).
   b. Beaches are currently open only for solo and family active recreation which is limited to swimming, surfing, running and walking.

2. Follow all beach rules, regulations and any posted access restrictions.

3. Plan to limit your time at the beach to permit others an opportunity to engage in active beach recreation without creating crowded conditions that could lead to beach closures.

4. Stay at least six (6) feet from others who are not members of your household at all times both in and out of the water.

5. Everyone needs a face covering while out of the water if there are other people nearby. Infants and children under the age of 2 should **not** wear cloth face coverings. Those between the ages of 2 and 8 should use them under adult supervision to ensure that the child can breathe safely and to avoid choking or suffocation. Anyone who has trouble breathing or is otherwise unable to remove the face covering without assistance should not wear one.

6. Wash hands often with soap and water for at least 20 seconds or use hand sanitizer with at least 60% alcohol, especially after going to the bathroom, before eating, and after blowing your nose, coughing, or sneezing.
   a. Beach bathrooms will be open but will be adhering to physical (social) distancing protocols

7. Do not share beverages or food with others that are not in your household.

**Recommendations (Not Requirements):**

1. Use sunscreen with at least SPF 15 and reapply if you stay out in the sun for more than two hours and after swimming, sweating, or toweling off.

2. Bring water and hand sanitizer or disinfecting wipes to wash or sanitize hands frequently.
DONTs

1. Avoid crowded areas or crowding around others at the beach.
2. Chairs, canopies, coolers, grills, and sitting or sunbathing are not allowed.
3. Gatherings of any size or other events are not allowed on the beaches including athletic competitions, youth camps or recreational programming.
4. Do not park at beach parking lots. These lots remain closed.
5. Piers, bike paths, volleyball courts and boardwalks are closed except for the purpose of customers accessing retailers curbside and doorside and essential businesses along the boardwalk.
6. Concessions and food vending are not allowed. Bring what you may need with you.

Know where to get reliable information
Beware of scams, false news and hoaxes surrounding novel coronavirus. Accurate information, including announcements of new cases in LA County, will always be distributed by Public Health through press releases, social media, and our website. The website has more information on COVID-19 including FAQs, infographics and a guide to coping with stress, as well as tips on handwashing.
